CyberPatriot Camps –Train the Trainer

Where: Cabrillo College (Aptos, CA)
When: June 19, 2017 Thru June 23, 2017
Target Audience: This course is for you if …

- You will be participating as an instructor for the Cyber Camps
- Your school is interested in playing CyberPatriot, the national cyber defense competition for youth K-12.
- Your college is interested in hosting K-12 schools to play CyberPatriot on your campus

Course Overview:
The CyberPatriot Train-the-trainer course will include information about hosting CyberPatriot competition and training at college sites with hands-on training using practice images simulating the competition experience. It will be informative for college faculty/staff and K-12 faculty/staff interested in cyber defense competition hosting and gameplay. The course will cover the event lifecycle for colleges hosting their region, training and team development for K-12, the CyberPatriot competition and training timeline, hands-on training with practice images developed by students, and training modules for Windows, Linux, Cisco and Cisco's Packet Tracer. The course will be focused on preparing instructors who will be participating in the CyberCamps held this summer.

Instructor:

Irvin Lemus has been in the Information Technology industry for 10 years, focusing on Cybersecurity, Virtualization, Systems and Network Management for small and medium sized businesses ranging from clinics, law firms, investment advisors, manufacturing to energy efficient experts, non-profit organizations and after school K-12 programs.

Irvin has been involved with CyberPatriot for three years as a coach, mentor and as the Regional Coordinator for the Southern California Cybersecurity Community College Consortium. He leads the participating community colleges in the consortium by training, mentoring and supporting the K-12 schools from various districts across Southern California.
