CyberSecurity Analyst+

When: June 26 Thru June 30, 2017
Where: Coastline Community College, Garden Grove CA
Target Audience: Those with a prerequisite knowledge at the CompTIA Security+ level and who would like to take the CSA+ exam and/or teach the content

Session Overview:
This course is designed to provide instructors with the knowledge and resources that will enable them to teach students how to apply behavioral analytics and other techniques utilizing available tools to improve the overall state of IT security, providing critical knowledge and skills that are required to prevent, detect and combat cybersecurity threats.

Instructor:

Steve Linthicum is a full-time faculty member at Sierra College in Northern California and has been teaching cybersecurity courses for over two decades. He holds a variety of certifications that relate to cybersecurity, including CompTIA's CASP and the ISC2 CISSP. Steve is transitioning o Coastline Community College this summer to serve as the project director for a new cybersecurity apprenticeship program.
