

Mitch Marek

Solutions Architect for Cisco Systems

Mitch Marek is a Solutions Architect for Cisco Systems. During his time at Cisco he has worked with several large organizations including Verizon Wireless, United States Post Office, Federal Reserve Bank, Direct TV, Ford, Pepsi and many others. Mitch started attending Moraine Valley community college in 1999 and became a NetAcad student. He earned his CCNA in 2000, and his CCNP in 2001. He became a Certified NetAcad

Instructor for CCNA in 2001 and continued on to becoming a NetAcad instructor in CCNP & Security in 2002. He earned his first CCIE in Routing and Switching in 2002. He went on to earn his second CCIE in Security in 2005. He started working at Cisco Systems in January 2007. He continued his CCIE quest and achieved his third CCIE in Service Provider in 2009. He currently works with Verizon Wireless on MPN which stands for Mobile Private Network. The MPN environment encompasses most police & fire departments, ATM machines for most large banks, Tracfone, OnStar, UPS and FedEx. MPN serves over 5000 different customers which includes millions of mobile devices nationwide.
